

# Project Design Phase 1

## Solution Architecture

Data	27 October 2022
Team Id	PNT2022TMID49148
Project Name	News Tracker Application
Maximum Mark	4 Marks

### **Solution Architecture:**

Solution architecture is a complex process with many sub process – that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- Define features, development phases, and solution requirements to the project.
- Provide specifications according to which the solution is defined, managed, and delivered to the customers.
