Containerizing the Application:

The screenshot displays the Docker Desktop application window. On the left sidebar, the 'Containers' tab is selected, with other options like 'Images', 'Volumes', and 'Dev Environments' visible. Below these, there's an 'Extensions' section with a 'Beta' badge and an 'Add Extensions' button. The main panel is titled 'Containers' and includes a 'Give feedback' link. A toggle switch for 'Only show running containers' is present, along with a search bar. A table lists the running containers:

		NAME	IMAGE	STATUS	PORT(S)	STARTED	ACTIONS
<input type="checkbox"/>		kind_saha 90dd6397eafd	app:latest	Running	5000:5000	7 seconds ago	

At the bottom right of the main panel, it says 'Showing 1 items'. The bottom status bar shows system metrics: 'RAM 3.38GB', 'CPU 4.07%', and 'Connected to Hub'. On the far right of the status bar, the version 'v4.13.0' is displayed next to a heart icon.
